

## To the UNHCR organization in Canberra

We, detainees in Manus Island, are writing to you to thank for coming your delegates in here. We are hoping to see positive results of your reports.

More than 3,000 years ago some people in the world treated their wounds by mould of bread. By passing time scientists discovered antibiotics from mould. Now, in the world today, many kinds of antibiotics are made for each type of infections.

More than 2,000 years ago Human Right Charter was written by some great people in the world. Human Right Charter have been completed and now exists in the United Nations. It is one of the best honours of mankind.

Many years ago, Hippocrates made an oath for medical doctors and also medicine staff like nurses, etc. When somebody takes the Hippocratic Oath, they must treat the best with patient people even they are enemy to them. The Hippocratic Oath is also one of the best honours of mankind.

On a place in the world is called Manus Island, an Island in PNG, many people have been detaining for around 33 months as the offshore processing centre of Australia. This time started from 19 July 2013. During this time antibiotics, Human Right Charter and Hippocratic Oath didn't work for one of them. He was Hamid Khazaei. He died because of septicemia. He died because of lack of antibiotics. He died because of lack of Human Right Charter. He also died because of lack of the Hippocratic Oath.

Unfortunately, IHMS is still a tool in hand of Australian and PNG governments to pressurize to us. We reported everything in details to your delegates. We just refer to some of them. Psychiatrists prescribe as much depression and sleeping tablets as that you want. They just want us to be quiet. Psychologists propose East Lorengue, an area near our compound as transit centre, as a psychology way to control your mind and that you will be happy there. If you see the fortune of people who went to East Lorengue, you understand what we

mean.

Prime Minister of PNG claims that we damage their reputation. He claims that we caused to damage the reputation of Manus people. If so, why is he cooperating with Australian government to send us to East Lorengue? We are 100% happy to leave this country as soon as possible not to damage their reputation.

There are just 27 countries in the world that participate in UNHCR resettlement programme. We would like to resettle in each of them. PNG is not of them. If people go to East Lorengue, that doesn't mean they are happy. That is because they are tired. Many of them wish to return to our compound.

Please remind Australian People that we are in critical condition. Long time in detention, around 33 months, have been deteriorating us. As Tony Abbott said, we are some part of Australian government policy to stop the boats. Malcolm Turnbull have been continuing that policy. Now boats have stopped. Operation Sovereign Border have been completed. In fact the last Bali Processing completed that policy. Detaining us at the moment wastes your taxes. Detaining us damage your reputation as free people. Even North Korea condemn Australian government. We wouldn't like to come to your country if you are not happy. But, we would like to resettle in UNHCR resettlement programme's countries. People of the same boat from Christmas Island went to Australia around 15 months ago and it is completely unfair.

To sum up, we, the signatories, believe you as a highest organization in the world for supporting us. If some detainees don't sign it doesn't mean they are happy, but they are disappointed from everywhere we are looking forward for your help. Please help us as much as you can.

Yours faithfully  
Detainees of Manus Island
